ELSEVIER

ETZELIEB

1580

del Signor
GALILEO GALILEI LINCEO,
Filosofo e Matematico primario del Serenissimo
Grand Duca di Toscana.

Con vna Appendice del centro di gravità d'alcuni Solidi.

Galileo's Two New Sciences was first published by the Elzeviers in 1638.

1880

Jacobus Robbers joins hands with four other businessmen in founding modern Elsevier in Rotterdam, the Netherlands. Inspired by the historical publishers, they adopt their name and the Non Solus printer's mark – meaning “not alone” – which highlights the relationship between authors and publishers.

Elsevier's first logo, inspired by the classic Non Solus.

1997

After almost two decades of experiments, ScienceDirect is launched as the first online repository of electronic (scientific) books and articles. Though librarians and researchers initially need to get used to the new technology, more and more of them switch to e-only subscriptions.

Unfolding the World of Scientific Information

ABOUT — PRODUCTS & SERVICES — NEWS — DEMO — USAGE TIPS

Introducing the Next Generation ScienceDirect® – the premier Web information source for the world's scientific, technical and medical research. ScienceDirect offers access to over 1,200 journals, and navigation across 30 million records with links to 10,000 journal titles – covering all fields of science.

- Visit <http://gatewaylink.sciencedirect.com> for news and information about content linking using the ScienceDirect Gateway.

View our [privacy policy](#) for details on how we protect information that you supply.

Send [feedback](#) to ScienceDirect
Software and compilation © 2000 ScienceDirect. All rights reserved.
ScienceDirect® is an Elsevier Science B.V. registered trademark.

The public area of this site is provided to inform subscribers and others about available ScienceDirect® services, information and products. Individual users may print or save portions for their own personal use. Other areas of this may be accessed only through a subscription or licence. Other use is prohibited.

2004

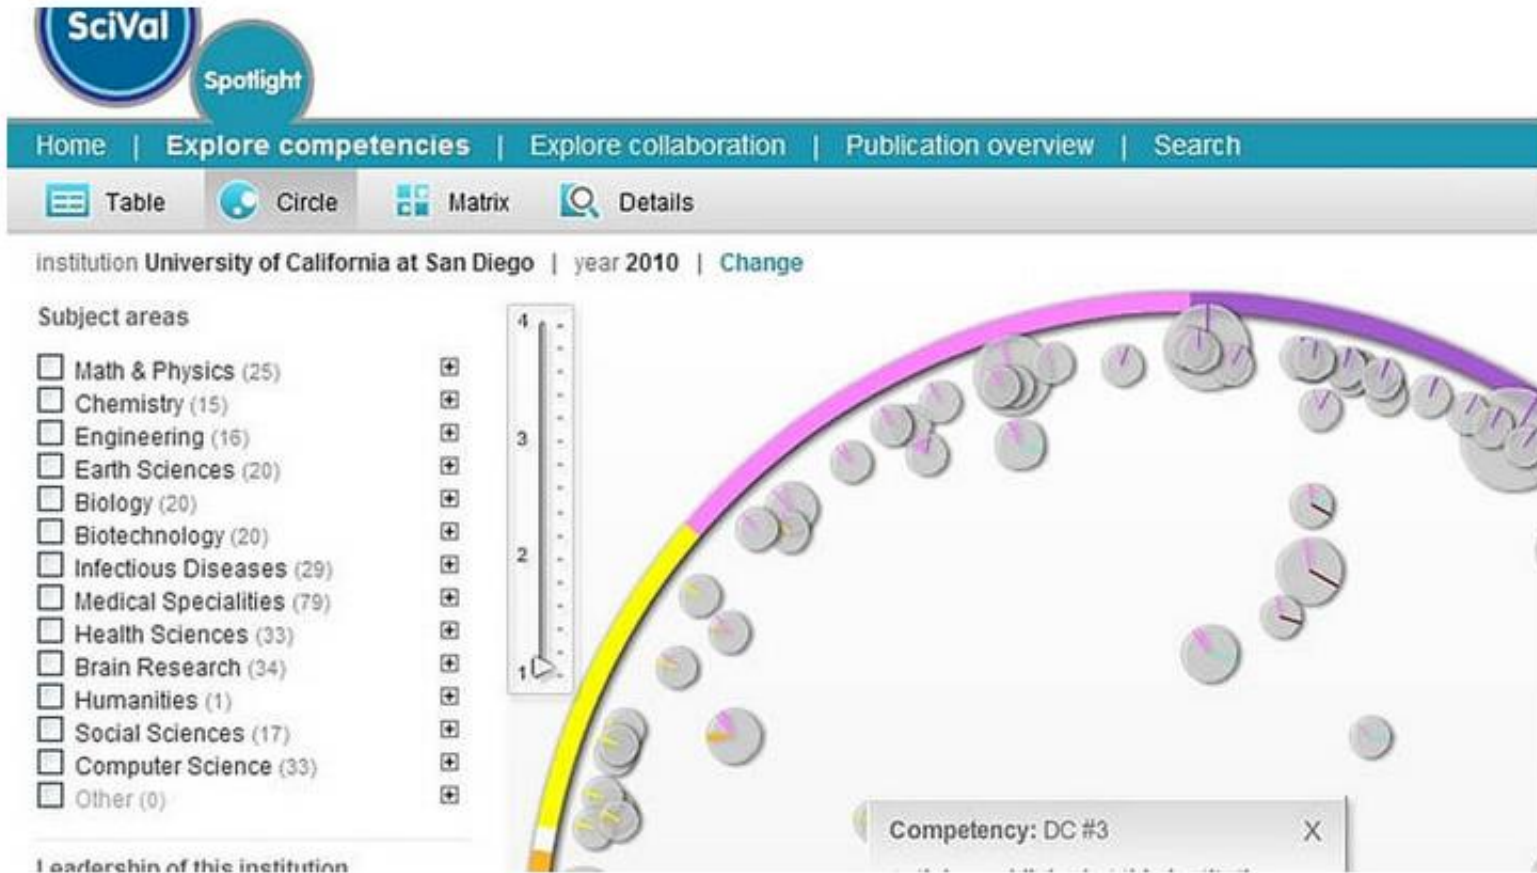

Scopus is launched. The abstract database covers journals and books from various publishers, and measures performance on both author and publication levels. Elsevier initiates a strategy as part of which “workflow solutions” software aims to help researchers in their work.

The screenshot displays the Scopus website interface. At the top left is the Scopus logo. To the right, there is a registration and login section with fields for 'Register or Login', 'username', 'password', and a 'Go' button. Below the logo are navigation buttons for 'Search', 'Sources', 'My Alerts', 'My List', and 'My Profile'. On the right side, there are links for 'Scopus Labs' and 'Help'. A banner below the navigation states 'Easily find relevant results from over 14,000 peer-reviewed titles.' and mentions 'Brought to you by Rutgers University Libraries'. The main search area has three tabs: 'Basic Search', 'Advanced Search', and 'Author Search'. The 'Basic Search' tab is active. It features a 'Search for:' input field with a dropdown menu set to 'in Article Title, Abstract, Keywords'. Below this is a second search field with a dropdown set to 'AND' and another 'in Article Title, Abstract, Keywords' dropdown. There are 'Search' and 'Clear' buttons. The 'Limit to:' section includes 'Date Range (inclusive)' with radio buttons for 'Published' (selected) and 'Added to Scopus in the last 7 days'. The 'Published' option has 'All years' and 'Present' dropdowns. The 'Document Type' dropdown is set to 'All'. The 'Subject Areas' section has a grid of checkboxes for various fields: All (checked), Health, Life Sciences, Agricultural and Biological Sciences, Chemistry, Physics, Mathematics, Engineering, Earth and Environmental Sciences, Social Science, Psychology, and Economics, Business and Management. There are 'Search' and 'Clear' buttons at the bottom of the search area.

2009

SciVal Spotlight is released. Based on citations in the Scopus database, this strategic analysis tool enabled research administrators to make informed decisions by measuring their institution's relative standing in terms of productivity, grants, publications, and more.

SciVal, ca. 2009.

2013

Mendeley joins the Elsevier family. Originally a London-based start-up, the app allows researchers to manage and share papers, discover new data and collaborate online.

The Mendeley crew, ca. 2013.

How do I use the advanced search?

Last updated on 18/09/2019 10.19 AM

[▶ Performing an advanced search tutorial](#)

The advanced search form offers an open design which allows you to specify one or more pieces of information (e.g., keywords, authors, dates, etc.) to find related documents in ScienceDirect. You can easily build an explicit query using multiple Boolean operators and nested clauses in your search.

None of the available fields are mandatory to an advanced search query. You are simply required to complete at least one field with searchable information.

For example:

Find articles with these terms
retinopathy -prematurity

In this journal or book title

Year(s)

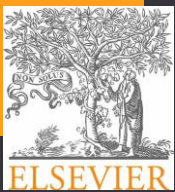

1995-1998

Author(s)

Author affiliation

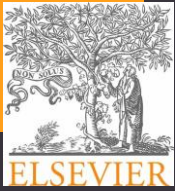

Title, abstract or author-specified keywords

高级检索

Advanced search

检索式检索

高级检索

Advanced search

布尔逻辑运算符

Use Boolean operators to combine multiple terms:

- Boolean operators currently supported include **AND, OR, NOT** and the hyphen (-) (used as a proximity connector)
- Boolean operators must be entered in all uppercase

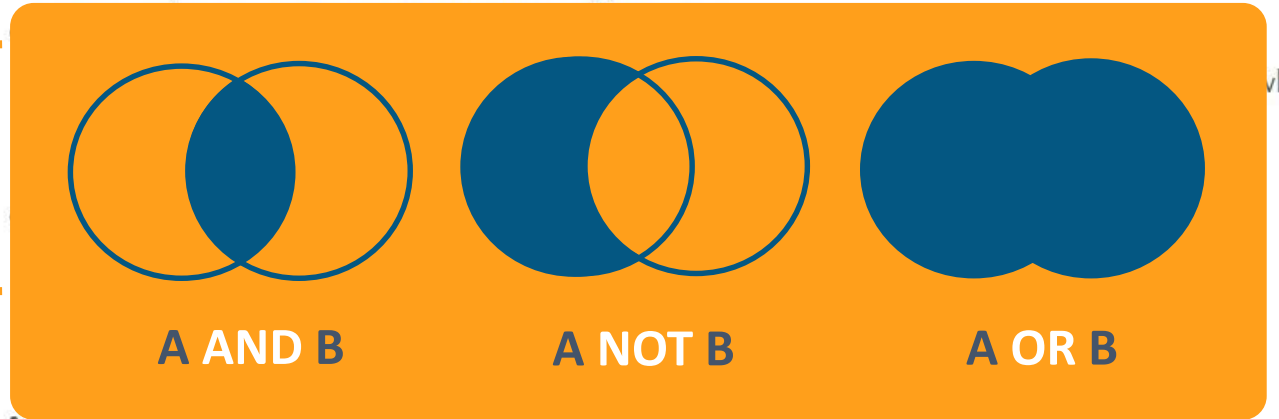

全部大写

“-”
=
“NOT”

布尔
优先级

括号分组

引号用来
限定短语

- Parentheses can be used when nesting clauses so the grouping is clear

For example: For a OR b AND c, enter (a OR b) AND c

Alternatively, enter a OR b) c

- Quotation marks specify terms with the same text to each other

For example: ("heart attack" OR "myocardial infarction") AND diabetes AND NOT cancer

The above example can be expressed more concisely as: ("heart attack" OR "myocardial infarction") diabetes -cancer

心脏病发作

心肌梗塞

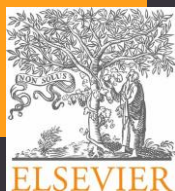

糖尿病

Notes:

- Proximity connectors are not supported at this time.
- Wildcard characters are not supported at this time.
- Stop words are not searchable. See stop words. +

• Understand the rules for searching special characters and formulas.

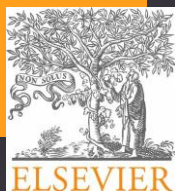

How to search for other characters

View the tips in the table below to see how to search for special characters

Character	Example
拼写变化 Spelling variations	Both British and American spelling variants are supported. A search for <code>colour</code> returns <code>color</code> , and vice versa
希腊字母 Greek letters and character equivalents	To search the Greek letter Ω , enter <code>omega</code> . This matches documents containing the word omega as well as the symbols Ω (uppercase omega) and ω (lowercase omega).
上下标 Subscript and superscript	Enter subscripted and superscripted characters on the same line as the other characters. To search for the chemical notation "H ₂ O," enter <code>H₂O</code> .
重音字符 Accented characters	To search for the name Fürst, enter <code>Fürst or Furst</code> .
特殊符号 Non-alphanumeric characters	Characters such as bullets, arrows, daggers, and plus signs are ignored.

Advanced Search

All of the fields are optional.

Find out [more](#) about the new advanced search.

MENDELEY

MENDELEY

The banner features a central image of a laptop and a smartphone, both displaying the Mendeley logo on their screens. To the right of the devices is a large stack of yellowed papers. The background is a dark space with stars. The text "I KNOW" is partially visible on the left, and "Mendeley brings your re" is below it. A red button with the text "Create a free account" is positioned below the text. The Mendeley logo and name are displayed on the laptop and smartphone screens. In the top right corner, there are three links: "Sign In", "Create account", and "Download", each enclosed in a red-bordered box.

The screenshot shows the Mendeley Desktop interface. At the top, there are navigation tabs: Feed, Library, Suggest, Groups, Datasets, Careers, Funding, and Library search. Below this is a toolbar with 'Add to', 'Delete', and 'Export to MS Word' options. The main area is divided into 'MY LIBRARY' and 'FOLDERS'. The 'MY LIBRARY' section contains a list of articles, with the first one highlighted in red: 'Ramucirumab plus docetaxel versus placebo plus docetaxel in patients with locally advanced or metastatic urothelial carcinoma (RANGE): a randomised, double-blind, phase 3 trial' by Petrylak D, de Wit R, Chi K, et al. The right-hand pane shows the 'Details' of this article, including the title, authors, and a list of all 32 authors.

The screenshot shows a web browser displaying the article 'Ramucirumab plus docetaxel versus placebo plus docetaxel in patients with locally advanced or metastatic urothelial carcinoma (RANGE): a randomised, double-blind, phase 3 trial'. The article is from the Lancet and is authored by Daniel P Petrylak, Ronald de Wit, Kim N Chi, Alexandra Drakaki, Cora N Sternberg, Hiroyuki Nishiyama, Daniel Castellano, Syed Hussain, Aude Fléchon, Aristotelis Bamias, Evan Y Yu, Michiel S van der Heijden, Nobuaki Matsubara, Boris Alekseev, Andrea Necchi, Lajos Gécz, Yen-Chuan Ou, Hasan Senol Coskun, Wen-Pin Su, Miriam Hegemann, Ivor J Percent, Jae-Lyun Lee, Marcello Tucci, Andrey Semenov, Fredrik Laestadius, Avivit Peer, Giampaolo Tortora, Sujfa Safina, Xavier Garcia del Muro, Alejo Rodriguez-Vida, Irfan Cicin, Hakan Harputluoglu, Ryan C Widau, Astra M Liepa, Richard A Walgren, Oday Hamid, Annamaria H Zimmermann, Katherine M Bell-McGuinn, Thomas Powles, and for the RANGE study investigators*. The article abstract states: 'The mechanism of action are available for patients with platinum-refractory metastatic urothelial carcinoma. We assessed the efficacy and safety of treatment with docetaxel plus FR-2 antagonist—or placebo in this patient population. This study is registered with ClinicalTrials.gov, number NCT02426125. Findings Between July, 2015, and April, 2017, 530 patients were randomly allocated either ramucirumab plus docetaxel (n=263) or placebo plus docetaxel (n=267). Progression-free survival was prolonged significantly in patients allocated ramucirumab plus docetaxel versus placebo plus docetaxel (median 4.07 months [95% CI 2.96–4.47] vs 2.76 months [95% CI 2.14–3.38]).' A 'Screenshot (Alt + A)' dialog box is visible over the article text.
